

A GREENER PARTNERSHIP

The **eco-friendly** solution to your transport needs

Severn-Lamb, in partnership with Transport Design International, introduces the Minitram, the latest offering in our range of visitor transit solutions.

Its primary power supply is Lithium ion batteries ensuring long operating duty coupled with the benefit of an eco friendly sustainable power source. The Minitram is available with or without powered doors, low floor height ensuring easy access, modular design allowing from 25 to 200 passengers makes this the perfect transport solution for all attractions, municipalities, resorts & leisure parks.

- Choice of power drive (Diesel, LPG, Battery)
- Battery is 100% Emission Free
- Modular design
- Open or enclosed passenger coaches
- Seating & standing
- 25-200 passenger capacity
